### Instructions for FACES Pain Rating Scale

This rating scale is recommended for children ages 3 and older.

Brief word instruction: Point to each face using the words to describe the pain intensity. Ask the child to choose the face that best describes his or her own pain, and report the appropriate numbers to your nurse.

Explain to the child that each face is for a child who has no pain (hurt) or some, or a lot. Face 0 doesn't hurt at all. Face 2 hurts just a little bit. Face 4 hurts a little more. Face 6 hurts even more. Face 8 hurts a whole lot. Face 10 hurts as much as you can imagine, although you don't have to be crying to have this worst pain. Ask the child to choose the face that best describes how much pain he or she has.

## Verbal Pain Assessment Scale

Ask your child to rate pain on a scale of 0 to 10. This rating scale is recommended for children over 8 years.
